

DESINFECTION CARPET

THE FLEXXOMAT

- The Flexxomat is extremely suitable for internal transport and passenger traffic.

- In combination with some accessories, the Flexxomat can be used fully automatically. These accessories ensure that the mat is refilled 24/7 without you having to think about it.

- The Flexxomat stays in position thanks to its patented design, which incorporates stainless steel into the mat to prevent the edges from curling up and moving the mat. As a result, unlike other disinfection methods such as disinfection bins, there is no risk of tripping!

- The mat is resistant to most common disinfectants. This means that you can usually use your own disinfectant.

DESINFECTION CARPET

THE FLEXXOMAT

SPECIFICATIONS

- Available in standard sizes with a width of 100, 200 or 300 cm and a length of 221 cm. Customer specific dimensions are possible up to a width of 600 cm.
- The mat can be supplied in various variants: the basic variant in which the mat is manually provided with disinfectant, a semi-automatic variant in which a pump provides the mat with disinfectant in time intervals, and a fully automatic variant in which, by means of sensors and a pump, the mat is filled fully automatically as required.
- Thanks to the innovative internal and external stabilisation strips, the mat is optimised to prevent curling in both directions (patent no. 2007148).
- The mat remains in position thanks to its innovative design and can also be moved. No drilling required.
